METABOLIC DISORDERS AND CARDIOVASCULAR HEALTH

As part of a broad institutional initiative in integrative biomedical sciences (IBio), Wayne State University is recruiting for faculty positions (tenured or tenure-track, open rank) in the integrative biology of cardiometabolic health and disease. The recruitment seeks to complement existing IBio strengths in cell biology, lipid metabolism, and cardiometabolic physiology. Of particular interest are investigators addressing molecular and cellular processes that impact energy metabolism, metabolic signaling, and cardiovascular function.

Successful applicants will benefit from a highly collaborative research environment working with colleagues throughout the University. Candidates must have a Ph.D., M.D., or equivalent degree in biomedical sciences relevant to metabolic diseases, with evidence of peer recognition in the field, a commitment to excellence in research education and training, and the ability to engage with broader integrative science themes for the purpose of achieving transformative and translational research gains. Applicants are expected to have already established extramural research funding or be on a clear path to secure and sustain extramural funding in support of their research programs. Faculty recruits will integrate with departments and colleges or schools consistent with their areas of expertise and interests and engage in all aspects of our academic mission, including research, education and service.

Competitive recruitment packages are available with salary and faculty rank based on qualifications. Applicants are encouraged to apply to posting #040049 through the Online Hiring System. Applications should include a curriculum vitae and a brief cover letter to the Assistant Vice President for Integrative Biosciences indicating the applicant’s potential for synergy in the targeted thematic areas.

Wayne State University is a premier, public, urban research university located in the heart of Detroit where students from all backgrounds are offered a rich, high quality education. Our deep-rooted commitment to excellence, collaboration, integrity, diversity and inclusion creates exceptional educational opportunities preparing students for success in a diverse, global society. Wayne State University encourages applications from women, people of color and other underrepresented people. WSU is an affirmative action/equal opportunity employer.

Founded in 1868, Wayne State University offers a range of academic programs through 13 schools and colleges to nearly 28,000 students. The campus in Midtown Detroit comprises 100 buildings over 200 acres including the School of Medicine, the College of Engineering, the Eugene Applebaum College of Pharmacy and Health Sciences and the College of Nursing. The university is home to the Perinatology Research Branch of the National Institutes of Health, the Karmanos Cancer Center, a National Cancer Institute-designated comprehensive cancer center, and a National Institute of Environmental Health Sciences Core Center - Center for Urban Responses to Environmental Stressors (CURES).

INTRODUCTORY BIOLOGY TEACHING FACULTY

Position Description Summary
The Department of Biological Sciences at The George Washington University (GWU) invites applicants for a teaching faculty position in Introductory Biology. This is a full-time, renewable contract position beginning Fall 2022. The successful candidate will be actively involved in the design, delivery, and supervision of undergraduate laboratories associated with our Introductory Biology sequence for majors. The candidate will teach a large lecture section in either the majors or non-majors Introductory Biology course each semester, as needed. The candidate will manage and coordinate labs and course topics while collaborating with our teaching faculty, laboratory managers, graduate teaching assistants, and undergraduate teaching assistants to ensure a high-quality laboratory experience that prepares our majors for advanced coursework in Biology. We particularly welcome candidates from groups that are historically underrepresented in biology and/or have demonstrated leadership toward building an equitable and inclusive scholarly environment.

To be considered, please complete an online faculty application (http://www.gwu.jobs/postings/88600). Review of applications will begin on January 10th, 2022, and continue until the position is filled, pending final budgetary approval. Employment offers are contingent on the satisfactory outcome of a standard background screening.

The university is an Equal Employment Opportunity/Affirmative Action employer that does not unlawfully discriminate in any of its programs or activities on the basis of race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, gender identity or expression, or on any other basis prohibited by applicable law.
